EXECUTIVE PROFILE

Technology and platform leader with **6+ years of specialized experience** turning complex business and operational challenges into **reliable systems, stronger controls, and scalable capabilities**.

Trusted by founders and executives to own business-critical platforms, advise on **growth, cost, risk, security, and customer experience**, and lead high-impact decisions from direction through execution.

PROFESSIONAL EXPERIENCE

LEAD PLATFORM & INFRASTRUCTURE ENGINEER

Apprentus | Remote | Jul 2022 - Present

- **Executive Partnership & Platform Ownership:** Owned the reliability and infrastructure roadmap for a marketplace spanning **12 domains and 80M+ monthly HTTP requests**; sustained **99.99% availability over six months**, served as the final technical escalation point, and advised the CEO on risk, investment priorities, customer experience, and long-term platform direction.
- **Financial & Operational Performance:** Reduced annual backup spend from **\$6.0K to \$2.4K** and media delivery from **\$928/month to \$98/month**; shifted **30% of eligible traffic to the Cloudflare edge** for more than **\$13.5K in annualized savings**.
- **Security & Risk Management:** Built automated threat defense across **AbuseIPDB, Fail2Ban, and Cloudflare** using a **70+ risk threshold**; maintained a **10,000-IP high-risk blacklist** while processing traffic from **102K+ unique IPs in 24 hours**, without blocking verified search-engine crawlers.
- **Reliability & Incident Leadership:** Reduced PostgreSQL storage from **199 GB to 133 GB (-33%)**; achieved a **22-second median MTTD** for Passenger socket failures and reduced **MTTR** through actionable alerts, recovery controls, and clearer escalation procedures.
- **Strategic Platform Development:** Initiated a **Terraform/Kubernetes modernization path** and productionized a **JWT-secured Jitsi/Jibri platform validated with 100 parallel recording workers**, creating a foundation for future scale.

CLOUD & DEVOPS ENGINEER

UBIAI | Remote, USA-based | Mar 2021 - Jun 2022

- **Founder Partnership & Cloud Strategy:** Partnered directly with the Founder and CEO to translate product priorities, financial constraints, and growth requirements into scalable, cost-conscious **AWS architecture across EC2, ECS, Lambda, CloudWatch, and serverless services**.
- **Operational Visibility & Decision Support:** Delivered an observability platform within weeks using **Prometheus, Grafana, and CI/CD automation**, exposing memory hotspots and architectural weaknesses while improving scalability, deployment consistency, and informed technical decision-making.

CLOUD & DEVOPS ENGINEER

iPrecision | Tunis, Tunisia | Jan 2020 - Feb 2021

- **Platform Delivery & Scalability:** Built a production **Amazon EKS/Kubernetes platform with Terraform**, automated deployments, scaling controls, CI/CD pipelines, rollback workflows, and operational safeguards.
- **Security & Operational Intelligence:** Centralized logging and security telemetry through **ELK and Amazon OpenSearch**, applying anomaly detection during controlled **DDoS simulations** to identify abnormal traffic and performance degradation.

LEADERSHIP, MENTORSHIP & ECOSYSTEM

TECHNICAL INSTRUCTOR - CLOUD, DEVOPS & CYBERSECURITY

Leaders University | Part-time, Nabeul, Tunisia | 2025 - 2026

- **Teaching & Talent Development:** Delivered hands-on labs, CTF exercises, workshops, and project mentoring across Cloud, Linux, AWS, DevOps, Cybersecurity, Data Science, and Big Data.
- **Innovation & Ecosystem Leadership:** Built trusted relationships with university leaders, professors, students, and industry professionals; earned the trust to propose and support **startup initiatives, technical clubs, workshops, hackathons, and international events.**

VENTURE DEVELOPMENT

- **AI Venture Contribution:** Invited to contribute to **MindTrackHealth**, an early-stage AI concept focused on detecting mental overload among students, drivers, and remote employees and enabling earlier preventive action.
- **Startup & Network Development:** Exploring a gaming venture with experienced technology professionals, including **Wael Dimassi, Senior Technical Account Manager and ML/GenAI Specialist at AWS**; able to connect ideas with technical specialists, professors, researchers, students, and early contributors for validation and team formation.

EDUCATION

M.Sc. in Data Science & Big Data | Leaders University, Tunisia2022

Bachelor's Degree in Computer Science & Business Management | Leaders University, Tunisia2020

EXECUTIVE CAPABILITIES

BUSINESS & TECHNOLOGY ALIGNMENT Company objectives, roadmaps, growth, customer experience	EXECUTIVE PARTNERSHIP Founder/CEO advisory, decision support, trade-off analysis	OPERATIONAL LEADERSHIP Reliability, incidents, MTTD/MTTR, service recovery
FINANCIAL STEWARDSHIP Cost optimization, cloud economics, investment priorities	RISK & SECURITY Defense-in-depth, threat automation, continuity, safeguards	VENTURE & ECOSYSTEM BUILDING Concept validation, talent networks, mentorship, partnerships

TECHNICAL FOUNDATION

CLOUD & PLATFORMS AWS (EC2, ECS, EKS, Lambda, CloudWatch), GCP, Hetzner, Linux, Kubernetes, Docker/Compose, Nginx, Passenger, VMware ESXi, Jitsi/Jibri	RELIABILITY & OBSERVABILITY Incident response, MTTD/MTTR, high availability, capacity planning, Prometheus, Grafana, New Relic, OpenSearch/ELK, Loki, Bugsnag
SECURITY & NETWORKING Cloudflare, pfSense, firewall/NAT policies, Fail2Ban, AbuseIPDB, SSH hardening, VPN access control, DNS/TLS, MFA	DATA & AUTOMATION PostgreSQL, PostGIS, Redis, replication, performance tuning, Terraform, Infrastructure as Code (IaC), Bash, Python, Git, GitHub Actions, Jenkins, CI/CD

LANGUAGES

Arabic: Native | English: Fluent | French: Professional proficiency - TCF 549/699
