

Youssef Douma

SENIOR PLATFORM, CLOUD & RELIABILITY ENGINEER

Nabeul, Tunisia | +216 53 737 878 | YoussefDouma@hotmail.com
linkedin.com/in/doumayoussef | jodouma.github.io

PROFESSIONAL SUMMARY

Senior Platform, Cloud & Reliability Engineer with **6+ years of specialized experience** operating business-critical platforms across **cloud infrastructure, SRE, security, DevOps, and platform engineering**. Trusted to own critical systems, lead incident response, and deliver measurable gains in **availability, performance, cost efficiency, and operational resilience**.

PROFESSIONAL EXPERIENCE

LEAD PLATFORM & INFRASTRUCTURE ENGINEER

Apprentus | Remote | Jul 2022 - Present

- **SRE & Platform Ownership:** Owned the reliability and infrastructure roadmap for a marketplace spanning **12 domains** and processing **80M+ monthly HTTP requests**; sustained **99.99% availability over six months** and served as the final technical escalation point, advising the CEO on critical infrastructure decisions.
- **Cost & Edge Optimization:** Reduced annual backup spend from **\$6.0K to \$2.4K** and media delivery from **\$928/month to \$98/month**; shifted **30% of eligible traffic to the Cloudflare edge** for more than **\$13.5K in annualized savings**.
- **Security Engineering:** Automated threat blocking across Fail2Ban and Cloudflare using AbuseIPDB reputation scores and a **70+ risk threshold**; maintained a **10,000-IP high-risk blocklist** while processing traffic from **102K+ unique IPs in 24 hours**, without blocking verified search-engine crawlers.
- **Database Reliability & Incident Response:** Reduced PostgreSQL storage from **199 GB to 133 GB (-33%)**; achieved a **22-second median MTTD** for Passenger socket failures and reduced **MTTR** through actionable alerts and recovery controls.
- **Platform Modernization & Scale:** Initiated a **Terraform/Kubernetes migration path** and productionized a JWT-secured Jitsi/Jibri platform validated with **100 parallel recording workers**.

CLOUD & DEVOPS ENGINEER

UBIAI | Remote, USA-based | Mar 2021 - Jun 2022

- **Partnered directly with the Founder and CEO** to translate product priorities into scalable, cost-conscious **AWS architecture** across EC2, ECS, Lambda, CloudWatch, and serverless services.
- **Delivered an observability platform within weeks**, exposing memory hotspots and architectural weaknesses while strengthening scalability, deployment consistency, and operational visibility through **Prometheus, Grafana, and CI/CD automation**.

CLOUD & DEVOPS ENGINEER

iPrecision | Tunis, Tunisia | Jan 2020 - Feb 2021

- **Built a production Amazon EKS/Kubernetes platform with Terraform**, automated deployments, scaling controls, CI/CD pipelines, rollback workflows, and operational safeguards.
- **Centralized logging and security telemetry** using ELK and Amazon OpenSearch, applying anomaly detection during controlled **DDoS simulations** to identify abnormal traffic and performance degradation.

TEACHING, MENTORSHIP & INNOVATION

TECHNICAL INSTRUCTOR - CLOUD, DEVOPS & CYBERSECURITY

Leaders University | Part-time, Nabeul, Tunisia | 2025 - 2026

- **Teaching & Mentorship:** Delivered hands-on labs, CTF exercises, workshops, and project mentoring across **Cloud, Linux, AWS, DevOps, Cybersecurity, Data Science, and Big Data**.
- **Innovation & Ecosystem:** Contributed technical guidance to early-stage initiatives across **AI, gaming, education, technical communities, hackathons, and international events**, collaborating with university leaders, professors, students, and industry professionals.

EDUCATION

M.Sc. in Data Science & Big Data | Leaders University, Tunisia 2022

Bachelor's Degree in Computer Science & Business Management | Leaders University, Tunisia 2020

CORE CAPABILITIES

PRODUCTION RELIABILITY High-traffic systems, availability, capacity planning, performance engineering	INCIDENT MANAGEMENT Detection, escalation, root cause analysis, MTTD/MTTR, service recovery	CLOUD ECONOMICS Cost optimization, lifecycle management, scaling, edge delivery
SECURITY ENGINEERING Defense-in-depth, hardening, network controls, threat automation	PLATFORM DELIVERY CI/CD, deployment automation, rollback, observability, operational safeguards	TECHNICAL LEADERSHIP Executive partnership, cross-functional delivery, mentoring, technical direction

TECHNICAL STACK

CLOUD & PLATFORM AWS (EC2, ECS, EKS, Lambda, CloudWatch), GCP, Hetzner, Linux, Kubernetes, Docker/Compose, Nginx, Passenger, VMware ESXi, Jitsi/Jibri	SRE & OBSERVABILITY Incident response, MTTD/MTTR, high availability, capacity planning, performance engineering, Prometheus, Grafana, New Relic, OpenSearch/ELK, Loki, Bugsnag
SECURITY & NETWORKING Cloudflare, pfSense, firewall/NAT policies, Fail2Ban, AbuseIPDB, SSH hardening, VPN access control, DNS/TLS, MFA	DATA & AUTOMATION PostgreSQL, PostGIS, Redis, replication, performance tuning, backup and recovery, Terraform, Infrastructure as Code (IaC), Bash, Python, Git, GitHub Actions, Jenkins, CI/CD

LANGUAGES

Arabic: Native | English: Fluent | French: Professional proficiency - TCF 549/699
