Available immediately for remote opportunities from Tunisia and open to international relocation with employer sponsorship or by agreement.

Summary

Platform and Infrastructure Engineer with 6+ years of hands-on experience across cloud infrastructure, DevOps, production reliability, Kubernetes, observability, automation and database operations. Professional depth combines Linux production reliability and containerized real-time infrastructure with AWS/EKS/Kubernetes implementation at iPrécision.

Experience

Apprentus — DevOps Engineer | Functional Platform & Infrastructure Lead · Jul 2022–Jul 2026

- Owned production infrastructure spanning Linux, Nginx/Passenger, PostgreSQL, Redis, Cloudflare, monitoring, Docker services and Jitsi/Jibri real-time communications.
- Validated five parallel containerized recording workers with successful export and idempotent reruns.
- Authored read-only infrastructure auditing and evidence automation with sanitized reporting and explicit safety controls.
- Contributed to PostgreSQL optimization that reclaimed 66 GiB, reducing storage from 199 GiB to 133 GiB.
- Coordinated rollback-ready changes and mentored a DevOps intern without claiming formal people management.

UBIAI — Cloud & DevOps Engineer · Remote, USA-based · Mar 2021–Jun 2022

- Designed and supported AWS infrastructure across ECS, EC2 and Lambda-based workloads.
- Built and improved CI/CD workflows and strengthened observability using CloudWatch, Prometheus and Grafana.
- Investigated memory bottlenecks and developed metric-driven scalability and resource-optimization recommendations.

iPrécision — Cloud & DevOps Engineer · Tunis, Tunisia · Jan 2020–Feb 2021

- Designed and deployed an AWS cloud environment using Kubernetes and Amazon EKS.
- Built CI/CD workflows and centralized logging, monitoring and search using the Elastic Stack and Amazon OpenSearch.
- Introduced auto-scaling, performance monitoring and anomaly-detection mechanisms for resilience and operational visibility.

Leadership & Teaching

- Technical Instructor at Leaders University Nabeul (2025–2026): delivered Virtualisation and Cloud instruction and designed applied AWS/Linux and Flask/PostgreSQL security labs.

Cloud and Platform Skills

AWS · ECS/EC2/Lambda · EKS/Kubernetes · Docker · Helm · Jenkins · Linux/Ubuntu · Nginx/Passenger · PostgreSQL/Redis · Cloudflare/DNS/TLS · New Relic/Grafana/Prometheus/CloudWatch/OpenSearch · Elastic Stack · Jitsi/Jibri · CI/CD · monitoring · backup/recovery · rollback validation

Education

- Professional Master's in Big Data — Bien, awarded Jan 2022
- Applied Bachelor's in Computing and Business Administration (Business Computing) — Bien, awarded Jul 2019
