Available immediately for remote opportunities from Tunisia and open to international relocation with employer sponsorship or by agreement.

Summary

Platform and Infrastructure Engineer with 6+ years of hands-on experience across cloud infrastructure, DevOps, production reliability, Kubernetes, observability, automation and database operations. Principal production escalation across Linux, application runtime, PostgreSQL, Redis, monitoring, edge/network controls and real-time communications, with a strong bias toward measurable diagnosis, reversible change and recovery readiness.

Experience

Apprentus — DevOps Engineer — Platform & Infrastructure Lead Responsibilities · Jul 2022–Jul 2026

- Served as principal escalation for incidents crossing Rails behavior, Nginx/Passenger capacity, PostgreSQL, Redis, network/edge controls, monitoring and Jitsi/Jibri systems.
- Contributed to a PostgreSQL reduction from 199 GiB to 133 GiB (66 GiB / ~33% reclaimed).
- Designed validation, rollback and recovery procedures; authored read-only infrastructure evidence tooling and share-safe reports.
- Validated five simultaneous recording workers, distinct scheduling, successful exports and idempotent reruns.
- Coordinated technical risks and production changes across engineering, QA, product and operational stakeholders; mentored a DevOps intern.

UBIAI — Cloud & DevOps Engineer · Remote, USA-based · Mar 2021–Jun 2022

- Investigated memory consumption and application bottlenecks across AWS ECS, EC2 and Lambda-based workloads.
- Strengthened observability through CloudWatch, Prometheus and Grafana and developed metric-driven scaling and resource-optimization recommendations.
- Built and improved CI/CD workflows supporting more consistent delivery.

iPrécision — Cloud & DevOps Engineer · Tunis, Tunisia · Jan 2020–Feb 2021

- Designed and deployed an AWS environment using Kubernetes and Amazon EKS and built standardized CI/CD workflows.
- Implemented Elastic Stack/Amazon OpenSearch observability, auto-scaling, performance monitoring and anomaly-detection mechanisms.

Reliability Stack

Linux/Ubuntu · Nginx/Passenger · PostgreSQL/Redis · New Relic/Grafana/OpenSearch · Cloudflare/DNS/TLS · Docker · Jitsi/Jibri · capacity and queue analysis · alerts · incident mitigation · backup/recovery · validation/rollback

Education

- Professional Master's in Big Data — Bien, awarded Jan 2022
- Applied Bachelor's in Computing and Business Administration (Business Computing) — Bien, awarded Jul 2019
