

RECOMMENDATION LETTER

RE: MR. YOUSSEF DOUMA

To whom it may concern,

I am pleased to write this letter of recommendation for **Mr. Youssef Douma**, whom I first knew as a student and with whom I have had the privilege of maintaining contact over the years. Throughout this time, I have been consistently impressed not only by his technical expertise, but also by the strength of his character, his maturity, and his professional mindset.

Youssef possesses a deep and continuously evolving understanding of **DevOps practices, cloud engineering, and related technical domains**. What truly distinguishes him, however, is the way he approaches challenges. He does not avoid complexity; instead, he confronts difficult problems with determination, strong analytical thinking, and a clear sense of ownership. He is someone I would trust to navigate ambiguity, diagnose issues effectively, and deliver practical, well-reasoned solutions.

Beyond his technical capabilities, Youssef demonstrates the **soft skills that are essential in modern engineering environments**. He communicates clearly, collaborates effectively, and shows a natural ability to lead when circumstances require it. I have personally observed him take ownership of demanding workloads and drive them toward successful outcomes, often going beyond the expectations of his role.

His versatility is one of his greatest strengths. He can contribute with impact not only as a **DevOps Engineer** or **Site Reliability Engineer**, but also in broader cross-functional responsibilities that require structure, initiative, and product-oriented thinking. His ability to connect technical execution with strategic judgment makes him a valuable asset to any ambitious team.

I therefore recommend Youssef with confidence for any role requiring a strong combination of **technical excellence, reliability, ownership, and leadership potential**. I am confident that he will bring meaningful value to any organization fortunate enough to work with him.

Please feel free to contact me should you require any additional information.

Sincerely,

Wael DIMASSI
Sr. Technical Account Manager @ AWS
