Recommendation for Youssef Douma

To whom it may concern,

I have worked very closely with Youssef where he was holding a position of Cloud and DevOps Engineer at UBIAI. Youssef is a very talented engineer with out-of-the box thinking. In a matter of few weeks, he was able to develop a monitoring dashboard for our complicated cloud architecture and identified weak spots in our memory usage. In addition, he came up with clever ways to incorporate serverless architecture and make the application more scalable and efficient.

Youssef possesses the ultimate "can do" attitude and will work overtime to make sure his task is completed to perfection.

I volunteered to write this recommendation for Youssef because I am very confident that he has the intelligence, work ethic, and communications skills to add value wherever he works.

Please feel free to contact me if you have any questions.

Walid Amamou, PhD
CEO and Founder of UBIAI
